My Favourite Toy

Learning by doing is a process that requires active participation. We learn by doing since it is the most effective way for an individual to develop holistically. On December 17, 2021, Daycare conducted 'My Favourite Toy' activity for children. They proudly displayed their fantasy toys to their peers and spoke about them. The main goal of the activity was to encourage creativity, inventiveness, and public speaking skills, as well as promote learning in an entertaining way. We were amazed to see the children perform so confidently, and we hope they will carry on the same tradition lifelong.

Christmas Celebration

Jingle bells, jingle bells, jingle all the way, may you be blessed this Christmas with peace and love all day! Christmas is celebrated around the world as a pleasant family occasion, with gifts, love, and peace being the highlights. Preprimary Wing celebrated online Christmas with love and fervour on December 24, 2021. Christmas decorations such as bells, socks, sweets, and snowflakes were wonderfully displayed in the school corridors. Our youngsters filled the air with laughter and excitement as they sang Christmas carols and danced in their celebration. In the spirit of the festival, a few activities for Nursery kids were devised, such as Cookie Decoration and Walnut Mug Cake. Grade Prep children, on the other hand, relished the opportunity to make yummy Chocolate Balls. Beautiful Christmas crafts were made to add a touch of uniqueness to the festivities. Santa made an appearance in the online classes, bringing enormous grins and excitement to everyone's face. Children were bathed in the festive atmosphere and wished everyone a Merry Christmas.

Colouring Competition

"Every child is born creative. The challenge is to keep that creativity alive".

-Kristina Webb

The intriguing and miraculous world of colours sparks children's imaginations, self-expression, creativity, and curiosity. Moreover, it develops a child's brain, ability to focus, concentration and enhance the love for nature. On December 10, 2021, the Nursery's tiny painters competed in a Colouring Competition. The children used various hues to colour the picture presented to them. It was a treat to observe them as they were ecstatic to display their work to their teacher. At DPS, GBN, we always put on activities and competitions that benefit a child's overall growth.

My Favourite Story Book Competition

“A book is a gift you can open again and again.”

— Garrison Keillor

Reading is the gateway for children that makes all the other learnings possible. It allows kids to envision and respond, and it aids in the development of emotional intelligence and creativity. Grade Prep conducted 'My Favourite Story Book Competition' on December 3, 2021, to encourage the students to read and introduce them to the world of stories and fairy tales. There are numerous books which leave an indelible impression on us and thus, the children got the opportunity to flaunt their favourite story book and its characters to their friends as well as teachers. Many of them also got dressed up like a character in the story and narrated the story. It was impressive to see the little ones explaining the 'Moral' of their stories. The enthusiastic participation of young book lovers made the session fruitful and enriching for everyone.

Life Skill Activities

'Life skills develop right attitudes to think smartly, act smartly and to live consciously.'

Alongside literacy and numeracy, life skills are essential learning outcomes of quality education. Life skills enable the people to interact appropriately, manage their own emotional states and make decisions and choices for an active, safe, and productive life. To sensitize our young learners about the importance of 'Life skills', Grade Nursery and Prep organised different Life Skills activities in the month of December, 2021 like- Sorting and Clothes folding, Table Manners, Emergency Situations and Gratitude. We were able to nurture the inquisitive minds of our young scholars through group discussions and hands-on activities such as constructing a First-aid kit, an emergency bag, sorting vegetables and fruits, folding clothes, and organising their closet. They also made a 'Thank you' craft to learn about the significance of gratitude. It was indeed an enriching month, wherein children absorbed a variety of skills.
