Children's Day Celebration

"Children are like buds in a garden and should be carefully and lovingly nurtured, as they are the future of the nation and the citizens of tomorrow." - Pandit Jawaharlal Nehru

The love and care that we give to our children today, will bloom as the fate of our country tomorrow. Every kid has the right to celebrate his childhood and make memories. Keeping these thoughts in mind, DPS, GBN organized an offline 'Children's Day Celebration' in school on November 13, 2021. The classes, corridors, play areas and whole Preprimary Wing was shimmering and decked up to welcome the little bundles of joy. The curiosity and excitement of coming to the school for the first time was glaring in the eyes of our young dipsites. The children as well as the teachers were looking splendid in their best party outfits. The tiny tots were thrilled to see the Shadow play and get tattoos of their favourite cartoon characters. They also made a beautiful Children's Day card by doing leaf printing and colouring. Swings, slides, trampoline, and games were the main attractions of the day. The little ones sportingly participated in all the activities and enjoyed them to the fullest. The children as well as the teachers twisted together on their favourite party songs and lastly the little munchkins relished their party food with their friends. The whole event was delightful, full of laughter, fun, beautiful moments and gave us memories of the lifetime.

Guru Nanak Jayanti

Whatever kind of seed is sown in a field, prepared in due season, a plant of that same kind, marked with the peculiar qualities of the seed, springs up in it.

- Guru Nanak Dev Ji, [Sri Guru Granth Sahib](#)

The auspicious occasion of Guru Nanak Jayanti is one of the most important festival in Sikhism. Guru Nanak Jayanti or Prakash Utsav is a festival that commemorates the birth of first Guru, Guru Nanak Dev Ji. A celebration of peace, spirituality and purification was held at DPS, GBN on November 18, 2021 to observe the 552th birth anniversary of Guru Nanak Dev Ji. The celebration was commenced with the sound of 'Gurbani' and 'Shabad Kirtan' that invoked the school corridors and filled them with spiritual atmosphere. Teachers discussed about the life and teaching of Guru Nanak Dev Ji. To inculcate cultural ethics, children were asked to dress up in traditional attire and little angels of Daycare made beautiful cards. The day culminated with Bhog ceremony, wherein children relished delicious 'Kada Prashad' and learnt the customaries. At DPS, GBN, our young dipsites do not just learn about the various festivals of India but also learn the importance of celebrating them with our near and dear ones with fervour.

Science Experiments

“Research is to see what everybody else has seen, and to think what nobody else has thought.”

- Albert Szent-Györgyi

Science is about asking your own questions and making your own investigations. It feels great when children have curiosity to try new things which they have not learnt at home. Our young dipsites of Grade Nursery and Prep, amazed us by replicating the experiments which were done by the teachers during Work Experience classes in the month of November, 2021. Students explored and enhanced their own learning by doing some science experiments such as Balloon Inflation and creating Lava in a fun way. The idea behind was to make our learners constructors of their own knowledge, divergent thinkers, risk takers and street smarts who can create their own paths and sail smoothly in all circumstances as experiential learning is learning for life. Overall, it was a joy to see our budding scientists performing exciting experiments.

Pyjama Party

“Children are like wet cement, whatever falls on them makes an impression.”

- Haim Ginott

Integration and assimilation of English language in play way is the key area of DPS, GBN. Keeping the same notion in mind, Daycare organised a 'Pyjama Party' for little toons on November 23, 2021 as a recap activity of letter P. To make the celebration memorable for students, arrangements were made to create a bedtime atmosphere. The parents were requested to keep few things ready before the class such as popcorn, pom-pom and party food. Little bundle of joy looked great in their pyjamas while the fun time helped and taught them about significance of body hygiene. To add more fun to the party, their favourite songs were played wherein children danced, watched movie together and relished snacks with their family. To give a long-lasting learning of letter 'P', a beautiful craft was made by tiny hands. Overall, the entire session was a great learning experience for our kids.

Learning more about 'Water'

"If there is magic on this planet, it is contained in water."- Loren Eiseley

Water sustains life. The right to water is really the right to life and livelihood. As children grow and comprehend the world around them, it is important that they learn how vital water is to their bodies and our environment. To enlighten the importance of Water in our forthcoming generation, Grade Prep took the concept of 'Water' in the month of November, 2021. The learning went to the next level as the children learnt about 'Water Cycle' and 'Properties of Water' by hands-on activities and experiments. They explored the process of Evaporation and Condensation by boiling the water (under the supervision of their parents) and covering it with a lid. The children were joyous to see the tiny droplets of water on the lid and learnt how it 'Rains'. Learning by doing always helps the students to connect theories and knowledge learned in the classroom to real-world situations. It was fun for our little munchkins to learn about the properties of water by mixing colours in the water and making lemonade. It was a fruitful learning experience as the children learnt and reaped the benefits of all the activities to the fullest.
