A New Day, A New Beginning

"Faith and Prayer both are invisible, but they make impossible things possible." – Unknown

Morning Prayer is a source of tremendous power for each individual as it infuses freshness and energy. We, at DPS, GBN, begin our day with a thoughtful online morning prayer. In her video, our Principal ma'am shares motivating words which encourages us to always be positive and, to look forward in life. Her morning address uplifts the spirits of both, students and teachers. It is also a pleasure to hear the melodious prayer, sung by the school choir, which reinforces our faith and helps us come together. We all love being a part of the Morning Prayer as it helps us to cultivate a sense of belonging towards our school.

The Knowledge Corner

"Reading is essential for those who seek to rise above the ordinary." – Jim Rohn

Reading is like dreaming with open eyes and we at DPS, GBN always encourage and motivate our students to read. Reading opens the door to a magical world, it not only improves vocabulary and our writing skills, it helps us broaden our horizons too. With an intention to promote the idea of 'Read and Grow' amongst the students, CBSE conducted '**Celebration of National Reading Day**' from June 19- July 18, 2020. A plethora of intriguing activities were organized for the students like an Open Art Competition, Selfie with your Favourite Book and Story Time, wherein, children got a chance to read wonderful stories from the links shared with them. Children of class III also took a digital reading pledge to make reading an intrinsic part of their daily life. We received an overwhelming response. All the students enjoyed and enthusiastically participated to make the reading month a huge success.

I Am Future Ready!

"Coding is today's language of creativity. All our children deserve a chance to become creators instead of consumers of Computer Science." -Maria Klawe

Coding is a basic literacy in today's digital era. DPS, GBN has taken the initiative to equip its students with the requisite skill of coding in partnership with 'Eupheus Learning' and 'RoboGarden'. The program is designed to enhance, enable and develop problem solving and critical thinking skills through hands-on activities using coding. A 17 hour-free certification program, Learn2Code, is organized for the students. Students across all grades have enthusiastically enrolled for this program. Students will be able to learn complex concepts with ease through carefully sequenced lessons containing various interesting programs designed at different levels in the form of sessions and tutorials. All the students are eagerly waiting and looking forward to learn something new.

"The capacity to learn is a gift; The ability to learn is a skill; The willingness to learn is a choice."

– Brian Herbert

The most beautiful thing about learning is that no one can take it away from you. DPS, GBN not only strives to provide its students the very best in education but continues to re-invent itself to everchanging times. At the beginning of the session the children were eased into online teachings through videos, however, in July, we moved on to blended teaching, wherein, online classes are conducted on Microsoft Teams platform, while co-curricular activity videos are being sent as per our carefully prepared Timetable. The classes are very interactive and are enjoyed by all the children as they enthusiastically participate and regularly share their work with their respective class teachers. Children have adapted to this new medium of education and are able to complete the task given. Indeed, learning never stops at DPS, GBN.

Get Set Go!

"Great things happen to those who don't stop believing, trying, learning, and being grateful."

– Roy T. Bennett

At DPS, GBN we always believe, that change is constant, and learning is continuous. To monitor the learning outcomes of our enthusiastic young students, we introduced our very first online assessment tool, which was successfully designed by the school. The Mock Test conducted, for each subject, before the UT-I, helped the students and parents to get accustomed to the online platform and tool. The UT-I was conducted successfully on the Digital Fruit application. Students were very excited to use the new tool to test their knowledge while the parents appreciated this ingenuity and were happy with the process.
